Highlights

MySound
MySound: Personal Sound Profiles allows you to pick the sound profile that fits in any situation to give you the best calling experience.

Handset speakerphone
Handsfree mode uses a built-in loud speaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or simply multitask.

Low power consumption:< 0.65 W
Philips phones are energy efficient and are designed to be respectful to the environment. Now the power consumed in stand-by mode is less than < 0.65 W.
